

Update from the Facilities Director

Time to set our direction!

At our recent Church board meeting there was considerable discussion on the cross roads we face as a church in setting a direction in terms of our future facility requirements.

There was equal discussion on the disappointment at the apparent lack of any clear direction along with the continuing lack of growth in the Building Fund. It was also suggested that the apparent lack of any clear direction could be part of the cause of any growth in the Future Fund.

In order to attempt to resolve this situation it was decided there would be a full leadership meeting on the evening of Thursday 24th June 2010.

This meeting will be part of a process to provide a clear set of parameters for the future facility requirements of Narara Valley Baptist Church.

We have invited feedback on the Future Facilities Requirements Document. Could I encourage anyone who wants to provide feedback to do so preferably by Sunday 20th June. This will enable the leadership team to also be aware of those comments at the meeting on the 24th.

Maurice Wrightson
Facilities Director
